

Announcing the 41st New England Complex Fluids Workshop

Friday, December 4, 2009
at Harvard University

Bettina Sobotka, *BASF*
"Bio-surfaces at BASF"

Stefano Tonzani, *Nature*
"How to get published in Nature journals (and what else we are up to)"

Hartmut Löwen, *Heinrich-Heine-Universität Düsseldorf*
"Particle-resolved instabilities in colloidal dispersions"

Tuomas Knowles, *Harvard University*
"Self-assembly of misfolded proteins"

Michael Rubinstein, *University of North Carolina*
"Molecular Model of Airway Surface Layer in Lungs"

The workshop brings researchers with an interest in soft condensed matter and biophysics together to discuss their work and explore collaborations. The day will include breaks for lunch and coffee to facilitate the exchange of ideas. The event is free; registration is required.

Please register in advance by December 2, 2009 at www.complexfluids.org

Event Registration: Maxwell Dworkin, Ground Floor Lobby

Meeting Location: Maxwell Dworkin, G115, 33 Oxford Street, Cambridge, MA

Contact: Christina Andujar, MRSEC Center Coordinator

Email: candujar@seas.harvard.edu

Tel: (617) 495-3275

www.complexfluids.org

Sponsored by the Materials Research Science and Engineering Center at Harvard University

Background: Monodisperse quintuple emulsions. Each emulsion consists of five nested droplets, like a little liquid Russian doll. They are created using a PDMS microfluidic device consisting of five drop makers in series.- Adam R. Abate
